

The OEF Social Enterprise Accelerator was formed to support the One Eleuthera Foundation's (OEF's) program area of boosting economic development and financial inclusion in South Eleuthera.

It has done this by developing unique programs tailored to the unmet needs of Non Profit Organisations (NPOs) NPOs and social enterprises. It started by accelerating OEF and OEF Partners to more effectively meet community needs during crises and beyond by providing mentoring, training, and access to capital. Through its Seed To Succeed program it encourages entrepreneurial activity in Eleuthera by awarding seed funding to entrepreneurs.

Once its proof of concept is further refined, it will focus on strengthening the third sector nationally to build a more resilient Bahamas by targeting social enterprises that have the ability to scale and make significant impact to achieving the UN SDGs
